DUAL DEFENSE

DEFEND DATA. DOMINATE THREATS.

IT and Cybersecurity Engineering and Compliance Advisory

SDVOSB CERTIFIED

NAICS 541519

Dual Defense delivers enterprise grade IT and security operations, detection and response engineering, and compliance readiness and audit support to organizations of every size, from small businesses and medical practices to government agencies and large enterprises. Our team is led by security professionals with NSA, NATO, and Fortune 50 experience, pairing hands-on engineering with a security auditor who has managed compliance for major corporations.

CORE COMPETENCIES

IT Engineering and Infrastructure

- Network design and management
- Systems administration
- Data center operations
- Cloud architecture and infrastructure deployment
- Server and endpoint management
- Network security architecture

Security Engineering and Operations

- SOC and NOC operations
- SIEM, SOAR, EDR, and NDR
- Threat intelligence integration
- Security platform deployment
- Cloud security architecture and engineering
- Identity and access management
- Infrastructure as code
- Disaster recovery and business continuity

Compliance and Auditing

- Security framework implementation
- Compliance automation
- PCI DSS assessments
- HIPAA and SOC 2 validation
- NIST 800-53 and ISO 27001
- FedRAMP readiness

PAST PERFORMANCE

Enterprise SOC Operations. Led large scale security operations teams. Architected disaster recovery and business continuity solutions, automated compliance verification for HIPAA and SOC 2, and deployed and managed enterprise security platforms across multiple environments.

Federal and Military Environments. Conducted cyber defense operations in classified and sensitive compartmented information facilities. Managed insider threat response and incident handling, and deployed threat mitigation and countermeasures across critical infrastructure networks.

Enterprise Compliance Auditing. Conducted formal compliance assessments for major enterprises. Validated security controls across regulated data environments, issued formal assessment reports for large organizations and service providers, and guided remediation of complex gaps.
